

The 15/20 Challenge

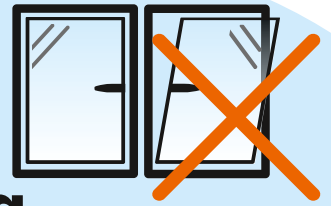

mastering
energy crisis –
winning
the future

Save 15-20% energy

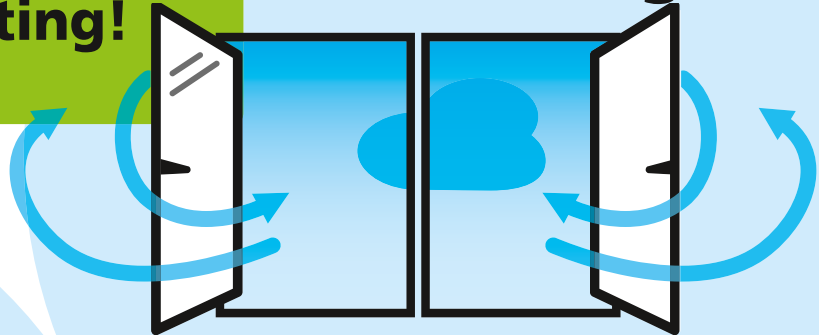

What are your ideas for saving energy?

Sign up with us klima@kreisgg.de

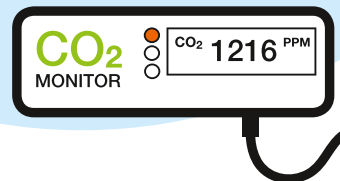

My school is participating!

Saving when airing

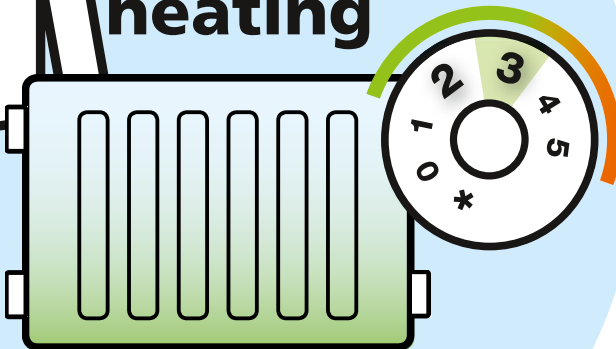

We air out as needed:
depending on the size of the class,
1-2 x airing per lesson for 3-5 minutes.
Target: not permanently well
over 1000 ppm.

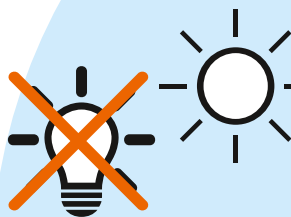

Saving when heating

approx.
19-20 degrees

Weather appropriate clothing –
we adapt.
1 degree saves 6% energy!

Saving on electricity

Lights off
when it's bright enough,
during breaks and after
leaving the rooms.

Lessons over, Smart-
board + PC + Printer +
Screens –
no stand by.
